International social science journal

Subject and author index

Vol. XXII (1970)

Subjects

Architecture as a bio-science, 681-90.
Australian case history of innovation, 42-53.
Collaborative research in developing nations, 505-23.
Cybernetic methods, application to law and administration, 459-501.
Developing nations
  conduct of collaborative research in, 505-23.
  salary policy for universities in, 195-213.
Ecology and the escalation of human impact, 628-47.
Environment
  and social change, 589-606.
  approaches to the measurement of, 661-71.
  human perception of, 648-60.
  the economics of pollution and the interdisciplinary approach to the planning of, 563-75.
  towards a planned urban, 672-80.
Futurologists, 'optimism' of, 502-4.
Global organization, 691-709.
India, scientists in, 54-79.
Law, application of cybernetic methods to, 459-501.
Legal ethnology, state and future tasks of, 476-94.
Legal learning, trends of
  in the Arabo-Islamic world, 367-77.
  in Hungary, 434-42.
  in Italy, 422-33.
  in Japan, 378-92.
  in Mexico, 393-421.
  in the United States of America, 443-58.
Salary policy for universities in developing nations, 195-213.
Science
  discovery and innovation, 42-53.
  internationality of, and nationality of scientists, 80-93.
  sociology of, 7-27.
Scientific communication and influence, 28-41.
Scientific communities
  conflict situations in, 111-26.
  emergence of, 94-110.
Scientists in India, 54-79.
Social research
  institutions, 301-24.
  policy for, 187-94.
  productivity, 243-63.
  relations between institutions and users of, 226-42.
  staff development in organizations of, 214-25.
Social sciences
  contribution to guidance of national policy, 264-300.
  and the United Nations system, 710-25.
Staff development in social research organizations, 214-25.
State, origin and role of, 459-75.
Technology
  and utopia: reflections on the conquest of nature, 576-88.
  impact of, on culture and emerging new modes of behaviour, 607-27.
United Nations system and the social sciences, 710-25.
